

## Now Enrolling: Project Onramp Summer 2022 ([projectonrampsf.com](http://projectonrampsf.com))

Project Onramp creates paid summer internships for San Francisco Bay Area college students who are from underrepresented communities -- helping to bridge the opportunity gap for these promising young people.

Project Onramp host companies commit to either setting aside an established internship for Project Onramp candidates or create new positions for Project Onramp to fill. Internships are not limited to STEM-related roles—we can match you with talented candidates with interest in business development, administration, operations, HR, finance, IT, marketing, etc. We will send you several resumes for each internship position you commit for Project Onramp and you will use your existing review and hiring processes to choose the student who best fits your needs.

If you are committed to creating a more diverse pipeline of students exploring careers at your company, please consider taking a Project Onramp intern next summer.

Contact [Casie Clymer at casie@lifesciencecares.org](mailto:casie@lifesciencecares.org) to discuss.

*Project Onramp is brought by Life Science Cares; Global Blood Therapeutics is a founding sponsor  
Biocom California is a partner*
